FERRETTO®

STORAGE GOES VERTICAL

VERTICAL STORAGE SYSTEMS

Why an Eurot vertical carousel?

- Space and time optimization
- Remote access to and consultation of records
- Traceability of materials and operations
- Safe storage of goods

Specifications

1. Steel structure
2. Tray rotation carousel
3. Picking bay
4. Operator interface
5. Electrical cabinet
6. Shelf configuration differentiated by unit load
7. Work counter

Features

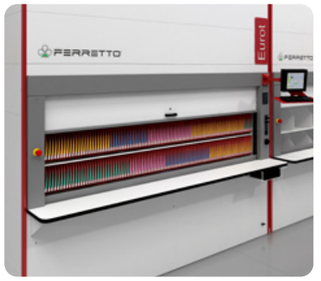
- Optimisation of space and working times
- Traceability of materials and operations
- Remote archive access and consultation
- Protection of goods

Vertical carousels Eurot

Automatic vertical carousel for storage and picking

Eurot is an automatic storage system with rotating shelves; it is the ideal solution when the available space is limited and the ceiling height does not exceed 4 m, the items to be stored are light and have uniform size and weight, and the material can be handled safely even without lifting equipment.

The rotating shelves always follow the shortest route while guaranteeing maximum picking and placing speed. Thanks to its versatility, Eurot is the ideal automatic storage system for both offices and manufacturing facilities.



Technical specifications

USE	OFFICE		INDUSTRY	
MODEL	5400	5500	70-415	70-615
WIDTH (mm)	2.740	3.190	3.364	
DEPTH (mm)	1.103		1.315	1.715
HEIGHT (mm)	From 2.330	to 3.770	From 2.780 to 6.560	From 2.870 to6.530
SHELF WIDTH (mm)	2.340	2.790	2.850	
MAX CAPACITY (kg)	2.800		7.000	
MAX SHELF CAPACITY (kg)	130		300	
SHELF DEPTH (mm)	365		415	615

Rotating filing system with standing ring binders and documents

Temperature-controlled rotating storage systems
(Hospital Sector)

Rotating storage systems for integrated circuit components

Rotating storage systems for manufacturing facilities
(footwear industry)

Warehouse Management System

The EjLog Warehouse Management System designed by Ferretto can be seamlessly integrated with the customer's ERP.

Thanks to its intuitive graphic layout and user-friendly interface, EjLog is the ideal software for managing all types of automatic storage solutions, traditional racking systems as well as the storage areas at ground level.

EjLog enables real-time warehouse management through a regular computer interface on PC or radio frequency terminals, in the case of traditional storage systems and storage areas at ground level, and at the same time allows remote monitoring and intervention.

Its "open" architecture facilitates dialogue with the company's ERP, ensuring increased productivity and space optimization through correct data management.

- **Goods and stock management and control**
- **Optimization of space and flow management**
- **Increased efficiency**
- **Fewer errors**
- **Preventive maintenance**
- **Remote control**
- **Simultaneous management of all storage and handling systems**

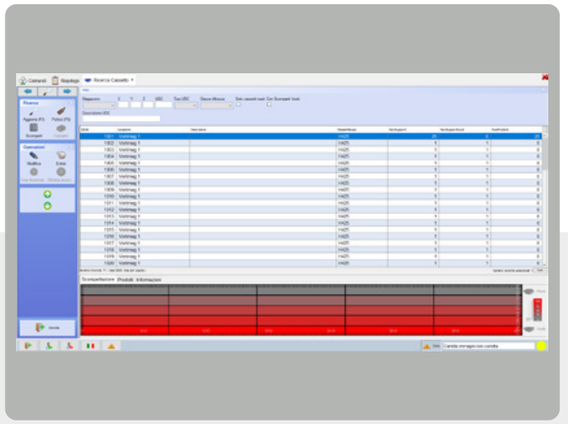
Summary of warehouse statistics



Tray search page

Main functions of EjLog for the management of automatic storage systems and storage areas at ground level:

1. Identification of inbound products
2. Storage within the storage system
3. Consultation of data concerning the products stored in the system
4. Retrieval of goods/products from the system
5. List execution with optimized logic
6. Connection to company host
7. User management and authorization for the available functions
8. Reports

Service Desk

Service Desk is a detailed reporting system which Ferretto offers to its customers for better management of Vertimag storage systems. Through a web portal, customers can access all data related to their machines in real time, for example:

- **Data of the storage systems (in the case of more than one system distributed in different company premises)**
- **Diagnostic data (alarms, errors)**
- **Mission log**
- **Storage system technical sheet**
- **Statistics on the use of trays**
- **Maintenance**

Better system control

Statistic data and reports in real time

Preventive maintenance

Number of missions carried out
