

VERTIMAG XXL

*Automatic vertical storage system
for section bars reaching 6 m in length*

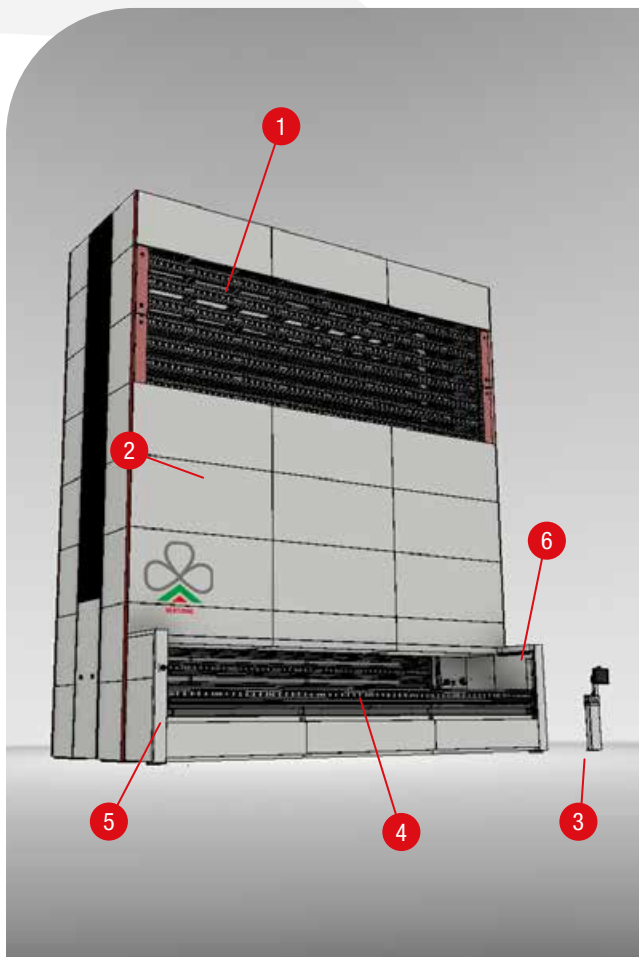

- ✓ Space optimization
- ✓ Improvement of stock management
- ✓ Speed up of order preparation
- ✓ Error reduction
- ✓ Goods protection
- ✓ Perfect ergonomics and total safety
- ✓ Productivity increase

High-performance, versatile and ergonomic vertical storage system

The automated vertical storage system is made up of two sides of racks accommodating metal trays and served by a lift device.

The trays of this special model allow materials up to 6 m in length to be managed very efficiently.

The dividers and pins provided allow the trays to be also used to store bars and section bars less than 6 m in length and small and medium-sized items in any shape and weight.

Technical data

- 1 High-strength tubular structure
- 2 High-durability pre-painted sheet paneling
- 3 Touch Panel screen 12" with sockets for external devices and user-friendly graphics
- 4 Picking bay with system for extracting the tray always at the same height
- 5 Check for incoming goods height - Pitch 25mm
- 6 Safety barriers for the operators

HEIGHT (m)	from 3.2 to 12
